# BIKERA NETWORK

Eli Lievens

VISION

Create a blockchain ecosystem that will function as a means to lend or offer for rent; carbon neutral vehicles.

Connecting every smartphone holder with this decentralised system seamlessly through an intuitive mobile or web app.

Engineer

PROBLEMS

Expensive rides

Most bike lending services are expensive and don't give back to their users,

This would add to a free market and supply infrastructure for new players

Maintenance

People who want to rent bikes without having the hassle of owning a bike.

 Fair public prices of bike repairs, maintenance and charging.
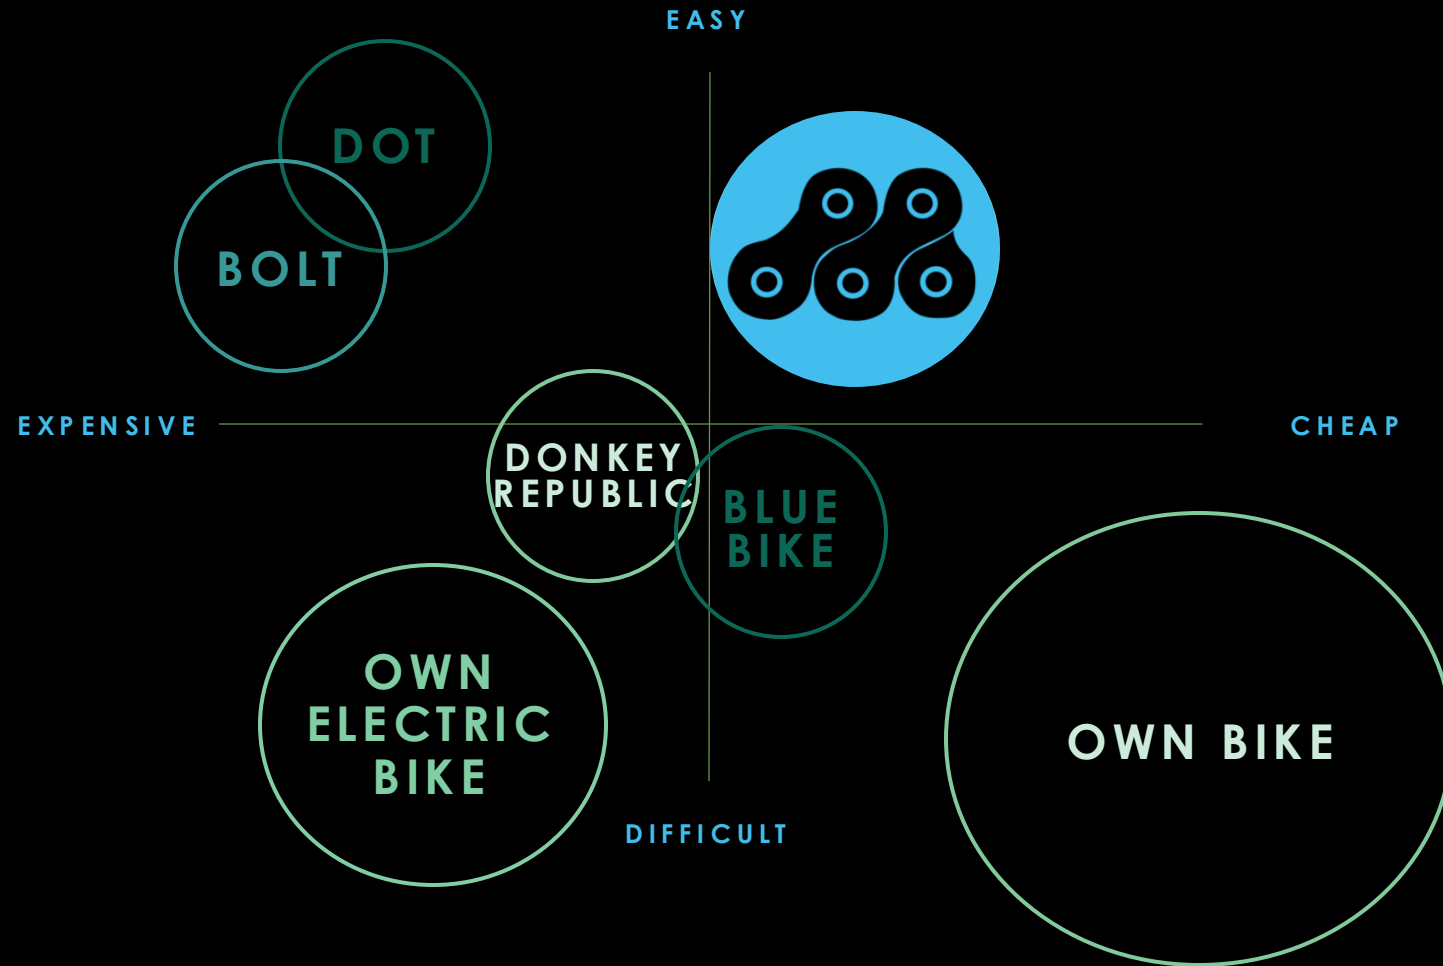

SERVICE SOLUTIONS

Digital support

Bikera gives individuals & companies with less technical knowledge capabilities to deliver a similar service as big coorporations
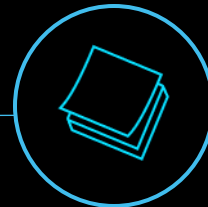

Semi Passive income

Anyone willing to add a bicycle to the network, is able to earn passive income for lending bikes and earning a piece of the mining rewards they genenerate

MODEL

Investing

Proof of concept;
Running on Raspberry Pies, cloud
infrastructure and Internet
Computer

Userbase

Expanding the network;
growing userbase on different
blockchains.
Marketing efforts
gamefied experience

Blockchain

Hqve mileage logged on
blockchain verifyable.
have NFT tokens earned as XP to
validate efforts of using the
networken

DePIN

Designin IoT or integrating smart
locks to enable a physical bicycle
network connected to the
blockchain

iMERA

COMMUNITY EFFORT

Bikers

- Using transportation
- Adding randomness to Proof-of-transit
- Bounties for checking thieving attemps
- Organize races

Supporters

- Offers transportation
- Maintenance
- Charging

Validators

- Run nodes
- Verify vehicles

SUMMARY

Get out there and mine $iMERA !

Physical activity mining is the new bitcoin protocol,

Like ICP is the new cloud computing.

THANK YOU
